Our Approach

Through the steps below, we work with your team to identify opportunities that maximize program performance.

1 Introductions
Meet our team and learn more about the WATCHMAN Calibration program.

2 Observation
Our team conducts interviews and observes case days to understand the current state of your program and vision for the future.

3 Application
We create an action plan with recommended solutions for you based on real-time feedback and data. You decide which solutions to prioritize within your program and we provide ongoing support to help you succeed.
